PROFESSIONAL SUMMARY

Technology and data professional with **4+ years of experience** across application support, business intelligence, data analysis, AI-enabled workflows, software development, and technology operations. Experienced in translating business requirements into practical technical solutions using **Python, SQL, JavaScript/TypeScript, cloud platforms, databases, APIs, automation tools, and modern web technologies**.

Currently involved in technology product development and digital solutions through **HaxenTech**, with hands-on experience spanning software engineering, AI tools, workflow automation, cloud services, data systems, and business applications.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript, C#

Frontend: React, Next.js, Vue.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, Prisma

Databases: PostgreSQL, MongoDB

Data & BI: Power BI, Tableau, Excel, Excel VBA, data analysis, reporting, data visualization

AI & Machine Learning: Azure AI/ML, Azure Cognitive Services, OpenAI, Claude, prompt engineering, machine learning workflows

Automation: Zapier, Make, Airtable, HubSpot, Notion, workflow automation, API-based automation

Cloud & DevOps: Microsoft Azure, Vercel, Git, GitHub, Azure DevOps, Docker, Kubernetes

Other: Agile workflows, system documentation, technical troubleshooting, application testing, cybersecurity fundamentals

PROFESSIONAL EXPERIENCE

HAXENTECH

Co-Founder & Chief Technology Officer (CTO) | Accra, Ghana | 2024 – Present

Lead technology strategy, product development, software architecture, and delivery of digital solutions for businesses and organizations.

- Lead the design and development of web applications, business systems, automation workflows, and technology solutions from requirements gathering through deployment.

- Develop full-stack applications using **Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, and REST APIs**, with deployments across modern cloud platforms.
- Design and maintain relational database structures supporting business applications, user management, registrations, subscriptions, transactions, and operational workflows.
- Build automation workflows that connect business applications, APIs, databases, communication platforms, and third-party services to reduce repetitive manual work.
- Integrate AI capabilities and external APIs into business workflows, including intelligent content processing, conversational systems, data handling, and workflow automation.
- Provide technical troubleshooting and application support, investigating issues across application logic, databases, APIs, authentication, hosting, DNS, and integrations.
- Translate business requirements into technical specifications, system workflows, database structures, and practical implementation plans.
- Manage Git-based development workflows, environments, deployments, testing, and production troubleshooting.
- Work directly with clients and stakeholders to understand operational challenges and deliver technology solutions aligned with business requirements.

INGCO GHANA

Business Intelligence Analyst | Hybrid GH | 2023 – 2025

Supported business decision-making through data analysis, reporting, dashboard development, and operational data management.

- Analyzed business and operational datasets using **SQL, Excel, Power BI, and data analysis techniques** to identify trends, anomalies, performance gaps, and actionable insights.
- Developed and maintained recurring reports and dashboards used to monitor operational and business performance.
- Automated repetitive reporting and data preparation activities using **Excel, VBA, SQL, and scripting**, reducing manual reporting effort by approximately **30%**.
- Consolidated data from multiple sources and performed validation and quality checks to improve reporting consistency and reliability.
- Investigated discrepancies in business data, traced issues to source systems or processes, and worked with stakeholders to resolve data-quality problems.
- Translated business questions into analytical requirements and presented findings in a clear format for technical and non-technical stakeholders.
- Supported improvements to reporting processes, helping teams access relevant information faster and reduce dependency on manually prepared reports.
- Maintained documentation for reporting processes, data sources, calculations, and recurring analytical workflows.

MASTERCARD RISK HUB

Cybersecurity / Risk Intern | Remote USA | Nov 2022

- Supported cybersecurity and risk-related activities through research, documentation, data review, and analysis.
- Assisted with reviewing security-related information and identifying potential issues requiring further investigation.
- Applied cybersecurity principles and structured analytical approaches to support risk-awareness activities.
- Documented findings and communicated relevant information clearly to team members.

AGENLY AI

Freelance Prompt & Content Analyst | Remote EMEA | Feb 2019 – 2022

- Analyze, evaluate, and improve AI-generated content according to task-specific quality requirements.
- Perform detailed content review, annotation, classification, and quality assessment across AI-related workflows.
- Apply structured reasoning and attention to detail when evaluating model outputs and identifying inconsistencies.
- Support AI training and evaluation workflows requiring accurate interpretation of instructions and consistent application of quality criteria.
- Maintain high-volume task throughput while meeting defined accuracy and quality requirements.

EDUCATION

MFT Online

Mini MBA – Innovations & Digital Transformation

Apr 2023 – May 2024

Harvard Online

Data Science – Machine Learning

2021 – 2023

GI-KACE

Software Development Programme

2021 - 2023

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Microsoft Azure AI Fundamentals
- LinkedIn Learning – Data Analyst Mastery, 2024
- Forage / Mastercard – Cybersecurity Security Awareness, Jul 2023
- Harvard Online – Data Science / Machine Learning
- MFT Online – Mini MBA, Innovations & Digital Transformation
